

CableServ® FM601 Mid-Split/High-Split Upgrade

Product Description

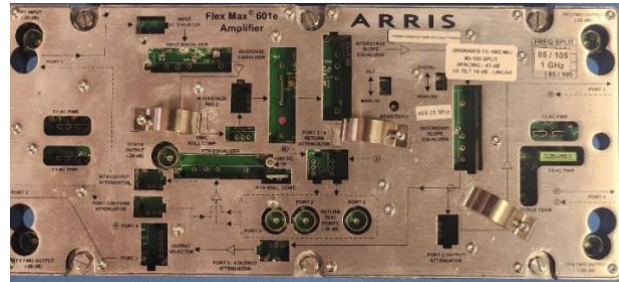

To provide a cost-effective solution in modifying legacy FM601 modules for mid-split/high-split band splits, CableServ® has designed the FM601 Band-Split Upgrade Kit which will allow for the extension of upstream bandwidth to 85/204 MHz.

This upgrade solution reuses existing OEM boards, legacy gain blocks, and plug-ins.

CableServ offers training assistance to cable systems with the installation and set-up of upgraded modules.

Applications

- Modifying band splits on Magnavox/Philips FM601 modules.

CableServ FM601 Mid-Split Module

Product Features

- Plug-in high isolation diplex filters
- Plug-in reverse response correction board
- 2-year warranty
