

CableServ®

BLE S Forward and Mid/High Split Upgrade

Product Description

CableServ® offers an easy and cost-effective upgrade of legacy amplifiers with existing 750/870 MHz downstream bandwidth, to 1 GHz bandwidth as well as expanding the upstream bandwidth to 85/204 MHz.

The BLE-S Series (and newer) Upgrade consists of new high performance gain blocks, diplex filters, forward and reverse correction boards, as well as the related hard-wired components. CableServ® also has a large assortment of Forward and Reverse EQ's that are available.

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

Applications

- GI/Motorola BLE S Series Amplifier
- Extending Downstream to 1 GHz
- Extending Upstream to 85/204 MHz

CableServ BLE-S series, 1 GHz Mid/High Split Upgrade

Product Features

- Easy Setup
- High isolation diplex filters
- Plug-in forward and reverse response correction board
- 2-year warranty
