

CableServ® BTN-M Series Forward Upgrade to 870 or 1GHz and Band-Split

Product Description

This CableServ® upgrade provides an easy and cost-effective solution to upgrading legacy BTN-M nodes to 1 GHz downstream and Mid-Split/High-Split.

The BTN-M upgrade solution consists of a new main board with plug-in diplex filters, as well as forward and reverse correction boards. This solution will use new gain blocks with increased bandwidth and operating level capability while reusing the chassis, cover, and power supply.

CableServ® offers training assistance to cable systems in the installation and set-up of this module.

Applications

- Extending the downstream bandwidth to 870/1002 MHz
- Extending Reverse Bandwidth up to 85/204 MHz

CableServ BTN-M upgrade

Product Features

- Easy Setup
- New main board
- Plug-in Band-Split defining components
- 2-year warranty
