

# CableServ® BT Series Forward Upgrade to 1.2 GHz

## Product Description

CableServ® provides an easy and cost-effective solution to transition from legacy 750/870 MHz downstream and 42 MHz upstream, to 1 GHz downstream and 85/204 MHz upstream. This solution applies to any BT models excepting the S-H series.

The BT series upgrade consists of new diplex filters, forward and reverse correction boards, as well as the related hard-wired components. New gain blocks will replace the legacy gain blocks which will provide greater bandwidth and output level capability.

CableServ® offers training assistance to cable systems in the installation and set-up of this upgraded module

## Applications

- GI/Motorola BT amplifiers, except the S-H series.
- Extending Downstream Bandwidth to 1 GHz
- Extending Upstream Bandwidth to 85/204 MHz

CableServ BT series Upgrade to 1 GHz and Mid/High Split

## Product Features

- Easy Setup
- High isolation diplex filters
- Plug-in forward and reverse response correction board
- 2-year warranty

---
