

CableServ®

4-Port Node Split Upgrade

Product Description

To provide an easy and cost-effective transition from legacy 42-54 MHz band splits, CableServ® offers a Mid-Split or High-split solution.

The GainMaker 4 Port Node Upgrade Kit consists of new diplex filters as well as a new reverse amplifier module. The kit will reuse the existing reverse plug-ins, reverse module hardware, and forward gain blocks.

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

CableServ 4 Port Node Split Upgrade Kit

Product Features

- Easy Setup
- High isolation diplex filters
- Reverse module
- 2-year warranty
