

CableServ® 3-Port Segmented Node Split Upgrade

Product Description

To provide an easy and cost-effective transition from legacy 42-54 MHz band splits, CableServ® offers a Mid/High Split upgrade solution.

The 3 Port Segmented Node Split Upgrade Kit consists of new duplex filters, a new forward HPF/RC board, a new optical interface board and a new reverse module. The kit will reuse the existing forward gain blocks which will maintain existing operational parameters.

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

CableServ Segmented Node Split Upgrade Kit

Product Features

- Easy Setup
- High isolation duplex filters
- New reverse module
- New optical interface board
- Plug-in forward response correction board
- 2-year warranty

Applications

- Cisco GainMaker 3 Port Segmented Nodes
