

CableServ®

UBT, BT, HGDL, LGDL

Mid-Split or High Band-Split Upgrade

Product Description

CableServ® offers an easy and cost-effective upgrade to help transition from legacy 42-54 MHz band splits to mid-split/high splits.

The mid-split/high-split upgrade for the Cisco GainMaker System Amplifier series, consists of new diplex filters as well as a forward HPF/RC and reverse module. The kit fits both 870 MHz and 1 GHz versions while preserving the existing downstream operating parameters.

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

CableServ Cisco GainMaker UBT, BT, HGDL, LGDL
Band-Split Kit

Product Features
