

CableServ®

JLX Series Forward Upgrade to 750 MHz Mid-Split/High-Split

Product Description

CableServ® provides an easy and cost-effective solution when upgrading to a 750 MHz downstream and a mid-split/high-split.

This upgrade consists of new duplex filters, an interstage slope control board, forward and reverse correction boards, as well as the related hard-wired components. Additionally, a new gain block will replace the legacy circuits.

CableServ® offers training assistance to cable systems in the installation and set-up of this upgraded module

CableServ JLX 750 PL/C Mid/High Split Upgrade

Product Features

- Easy Setup
- High isolation duplex filters
