

CableServ®

MB Series Band-Split Kits

Product Description

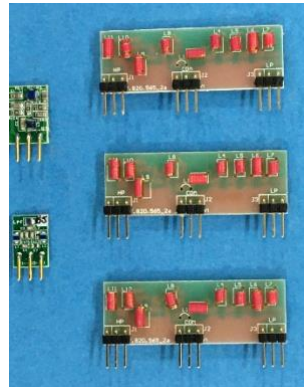

To provide an easy and cost-effective transition from legacy 42-54 MHz band splits, CableServ® offers Mid-Split/High-Split solutions.

The GI MB Mid-Split Kit consists of new diplex filters, a reverse low pass filter and reverse correction boards. Optionally, the kit can include a forward response filter correction board. The kit will reuse the existing amplifier gain blocks. This Kit will apply to any GI MB 75S or newer. Kits can be installed by the system or modules can be cycled to CableServ® for installation and testing of the module.

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

Applications

- Extending Reverse Bandwidth to 85/204 MHz

CableServ GI MB Upgrade Mid-Split Kit
