

# CableServ® MB Series Forward Upgrade to 1GHz with Mid/High Split

## Product Description

CableServ® offers an upgrade solution for MB 75S (inclusive of newer generations) series of GI Mini-Bridgers. The easy and cost-effective upgrade will transition legacy 750/870 MHz downstream bandwidth with 42-54 MHz band splits to 1 GHz downstream bandwidth with mid-splits/high-splits.

This upgrade provides new duplex filters, forward and reverse correction boards, as well as the related hard-wired components. The existing gain blocks will be replaced with higher performance hybrids.

CableServ® offers training assistance to cable systems in the installation and set-up of this upgraded module.

## Applications

- Extending Downstream Bandwidth to 1 GHz
- Extending Reverse Bandwidth to 85/204 MHz

CableServ MB series 1GHz Mid/High -Split Upgrade

## Product Features

- Easy Setup
- High isolation duplex filters
- Plug-in forward and reverse response correction board
- New gain blocks circuits
- 2-year warranty

---
