

CableServ® SYS II/III HGDL Forward Upgrade with Mid/High Split

Product Description

To provide an easy and cost-effective transition from legacy 750MHz 42-54MHz band splits, to 1GHz Mid-Split/High-Split, CableServ® offers an upgrade solution.

The SYS II/III High Gain Dual 1GHz Mid-Split/High-Split upgrade solution consists of a new main board, reusing legacy SA-SXP pads, and GainMaker style EQ and AGC. New gain blocks will increase the operational performances. The upgraded unit will reuse legacy housings and power supply. All band-split defining modules are plug in style, allowing cable operators to easily field install high-split upgrades.

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

Applications

- Scientific Atlanta SYS II/III HGDL

CableServ SYS II/III Forward Upgrade
