

CableServ® SX Trunk/Bridger Drop-In Replacement up to 870MHz

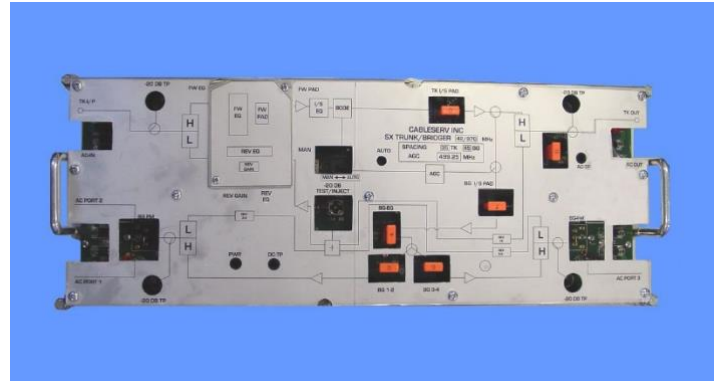

Product Description

This drop-in replacement provides an easy and cost-effective solution to upgrading legacy GI SX Trunk-Bridgers to 750/870 MHz and Mid-Split/High-Split reusing the legacy housings and amplifier spacing.

This upgrade will replace the legacy SX module and power supply with a new module with an integrated power supply. It also uses new gain blocks with increased bandwidth and operating level capability.

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

CableServ SX replacement module

Product Features

- Easy Setup
- New main board
- Plug-in band-split defining components
- 2-year warranty

Applications

- Extending downstream bandwidth to 750/870MHz
- Extending reverse bandwidth up to 85/204 MHz
