

CableServ® 7MMLE/FM320/FM321 Series Band-Split Upgrade to Mid/High-Split

Product Description

To provide an easy and cost-effective transition from legacy 42-54 MHz band splits, CableServ® offers an upgrade to mid/high split solution.

The 7MMLE/FM320/FM321 Band Split Upgrade consists of new diplex filters, forward and reverse correction boards, as well as the related hard-wired components. This upgrade solution will reuse the existing gain blocks.

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

Applications

- Extending Reverse Bandwidth to 105/204 MHz
- Magnavox/Philips 7-MMLE 198; FM320; FM321

CableServ 7MMLE/FM320/FM321 Band Split Upgrade

Product Features

- Easy Setup
- High isolation diplex filters
- Plug-in forward and reverse response correction board
- 2-year warranty
