

CableServ® C-COR E5 series 750 MHz and Mid/High-Split upgrade

Product Description

To provide an easy and cost-effective transition from legacy 450/550 MHz downstream and 42-54 MHz band splits, CableServ® offers 750 MHz Downstream and optional Mid/High split solutions.

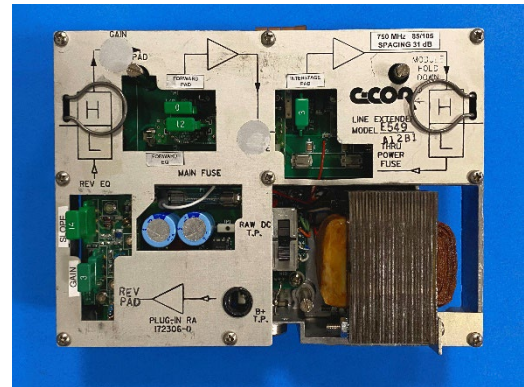

The E5 series LE Upgrade consists of a new Forward board with plug-in diplex filters, and high performance gain blocks. This upgrade will reuse the existing Upstream gain block. The upgraded module will use SPB and SEQ style plug ins.

Available, an assortment of Downstream and Upstream EQ's (available fixed EQ or Padded EQ's).

CableServ® offers training assistance to cable systems in the installation and set-up of this upgrade solution.
