CableServ® C-COR SF series 750 MHz and Mid/High-Split upgrade

Product Description

To provide an easy and costeffective transition from legacy 550 MHz downstream and 42-54 MHz band splits, CableServ® offers a 750 MHz Downstream and optional Mid/High split solutions.

The SF minitrunk series Upgrade consists of new main board with plug in diplex filters, and new performance gain blocks. This upgrade will use SPB, SEQ and FlexNet style distribution plug ins. This upgrade reuses the existing Upstream gain block.

Also, available is an assortment of Downstream and Upstream EQ's (available fixed EQ or Padded EQ's)

CableServ® offers training assistance to cable systems in the installation and set-up of this upgrade solution.
