

CableServ®

C-Cor NL Band Split to Mid/High-Split Upgrade

Product Description

To provide a cost-effective transition from legacy 42-54 MHz band splits, CableServ® offers Mid/High mid-split solutions.

The NL series upgrade solution will require a new main board drop in with plug-in diplex filters, downstream and upstream response correction boards. This upgrade will reuse existing downstream gain blocks and legacy downstream operating parameters.

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

CableServ C-Cor NL Series Band Split to Mid-Split/High-Split Upgrade
