

# CableServ® Flex Net 700 B Mid/High-Split Upgrade

## Product Description

To provide an easy and cost-effective transition from legacy 42-54 MHz band splits, CableServ® offers a Mid/High split upgrade solution.

The FlexNet 700 B series Mid/High-Split Upgrade consists of board level modifications of legacy diplex filters and forward and reverse correction circuits. The upgrade solution will reuse the existing gain blocks. CableServ® offers an assortment of Upstream EQ's (fixed or variable)

CableServ® offers training assistance to cable systems in the installation and set-up of this mid-split kit.

CableServ Flex Net 700 B Mid/High-Split Upgrade
