

# CableServ® CEL FM601 1.2 GHz Mid/High-Split

## Product Description

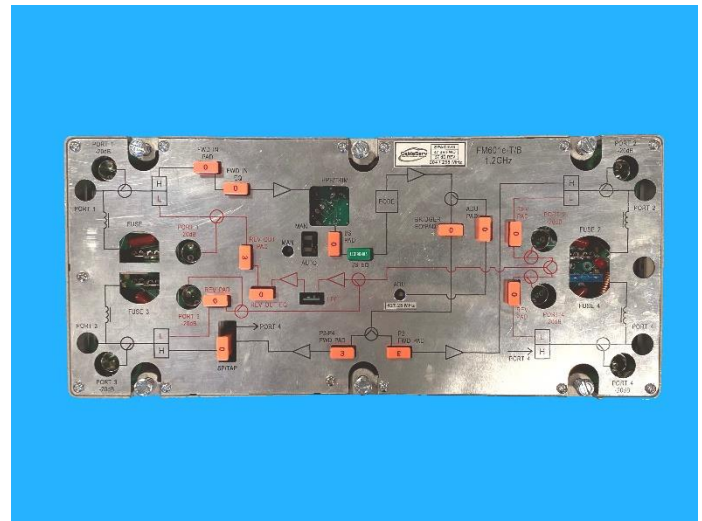

In order to provide cable operators an easy solution to upgrading legacy modules, CableServ® has developed the FM601 Trunk Bridger drop-in module.

Our drop-in amplifier replaces any legacy GNA Philips/Magnavox amplifier that has limited downstream frequency ranges of 550/750 MHz. Our solution uses the existing housing and allows for 870/1002/1218 MHz downstream frequency ranges as well as 42/54, 85/105 or 204/258 MHz band-splits. The FM601 Trunk-Bridger amplifier contains a new power supply.

CableServ® offers training assistance to cable systems in the installation and set-up of this module.

## Application

- Increasing Bandwidth up to 1218 MHz
- Optional band split: 42/54, 85/105 and 204/258 MHz

**CableServ® FM601 1.2GHz Trunk/Bridger**

## Product Features:

- Easy Setup and Installation
- High performance gain blocks
- Plug-in high isolation Diplex Filters
- New Power Supply
- 2-year warranty
