

CableServ® BLE 87S/100 Series Forward Upgrade To 1.2GHz with Mid/High-Split

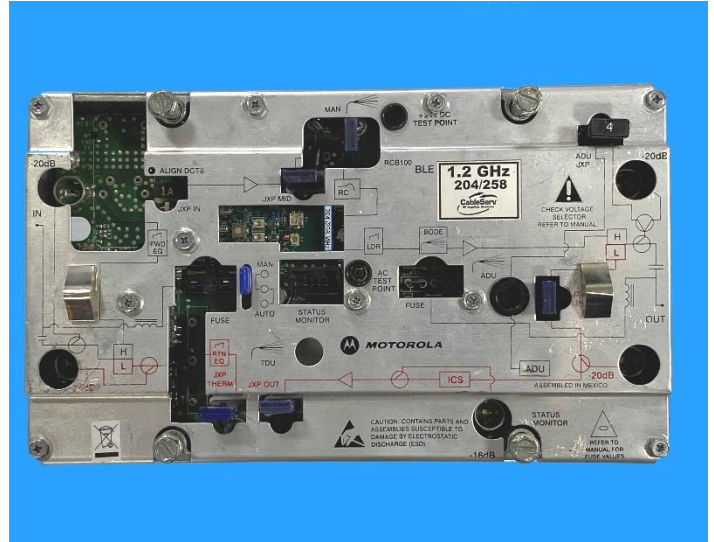

Product Description

CableServ® offers an easy and cost-effective upgrade of legacy amplifiers with existing 870 MHz or 1GHz downstream bandwidth, to 1.2GHz bandwidth as well as expanding the upstream bandwidth to 85/204 MHz. The BLE87S Series (and newer) upgrade consists of new high performance gain blocks with increased reverse gain for high split upgrade. As well as upgrading diplex filters, forward and reverse correction boards, as well as the related hard-wired components. CableServ® also has a large assortment of Forward and Reverse EQ's that are available as well as a 1.2GHz Forward Padded EQ. CableServ® offers training assistance to cable systems in the installation and set-up of the 1.2GHz mid/high split upgrade.

Applications

- GI/Motorola BLE87S/100 Series Amplifier
- Extending Downstream to 1218 MHz
- Extending Upstream to 85MHz or 204MHz

CableServ® BLE 87S/100 Series Forward Upgrade To 1.2GHz with Mid/High-Split

Product Features

- Easy Setup and Installation
- High performance gain blocks
- Plug-in high isolation Diplex Filters
- 2-year warranty
